Introducing

the most advanced power line safety products on the market today.

VOLTEK 2™

Power Line Warning & Range Limiting System

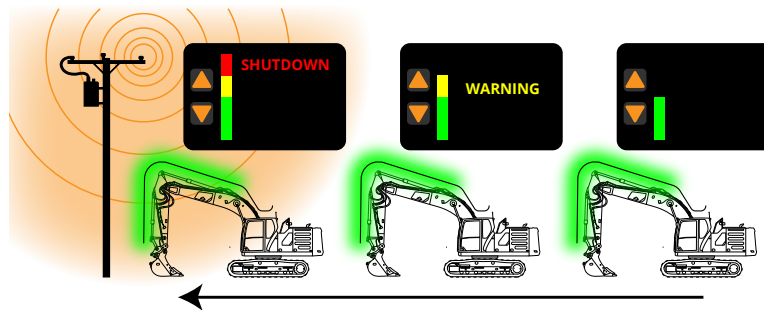

Features:

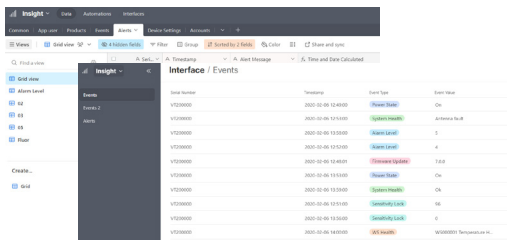

- Consistent and reliable detection of energized, above ground power lines (50-60Hz)
- Easy-to-use, intuitive display and progressive audio alerts maximizes usability without distracting the operator
- Auto-on feature turns system on upon equipment start up
- Auto-Max™ feature defaults to maximum sensitivity upon start up for maximum detection
- Adjustable sensitivity to accommodate every job site and situation
- Three progressive warning levels based upon sensitivity level settings
- Adjustable, progressive warning zone can be set to give ample warning before “SHUTDOWN”
- SHUTDOWN mode: Controls E-Stop or other systems on your equipment to stop movement or shutdown equipment when Voltek 2 indicates “SHUTDOWN” on display
- Durable ABS enclosure with IP67 rating for water and dust resistance
- Optional LTE connectivity (with SIM card and subscription plan) connects with Voltek Insight analytics and settings app to track and manage your systems
- Simple and quick installation

How it works:

The Voltek 2™ detects the E-field surrounding a power line. Audible and visual cues, as well as other optional features, are used to aid the operator in avoiding the detected power lines.

Accessories:

**ALWAYS ON.
ALWAYS ALERT.™**

Voltek Systems products are designed and built with pride in the USA by United Safety Incorporated.
