Take full control of your equipment with the Dualtek.

VOLTEK **DUALTEK**™

POWER LINE WARNING & RANGE LIMITING SYSTEM

The Dualtek offers power line detection but adds the limit switch functionality to create any auxiliary safety controls on your equipment. For such uses as hopper grate shutdown on concrete pumps to rotational movement on excavators and everything in between, the Dualtek offers full control of your equipment.

- Detects 50-60 Hz overhead power lines greater than 2500kV
- Back-lit display
- Adjustable sensitivity
- RECALL mode lets you recall previous sensitivity level
- Hydraulic or E-stop integration
- Dust and water resistant (IP67 rating)
- Antenna length up to 65 M
- 110+ db external siren
- Integrates with up to three limit switches
